II. 6. *intr.* To be pleased, to like; to have the will or desire; to have the humour; to think proper. (In sense, exactly = the passive in 4, 4 b.)

The history of this inverted use of *please* (observed first in Scottish writers) is obscure. The supply the same change took place in the 14th c. in the use of the synonymous verb LIKE, where the impersonal 'it liked him', 'him liked' became 'he liked' (1450). It may therefore be assumed that 'I please' was similarly substituted for 'it pleases me', 'me pleases' (1340 in 3 (*c*)). Cf. also Mather's 'me ought', in addressive *Mirth Arithmet* 'me aughts', with World's 'I ought', later 'I ought'. The remarkable thing is the case of *please* is that the orig. was already logically governed by the passive in *be pleased* (1340), and that the new idiom was therefore not needed, 'he pleases' being simply = 'it pleases him', and 'he is pleased'. Shakspere uses the three forms indifferently. Indeed, all the constructions of the vb., exc. 6 c, are richly exemplified in his works: see Schmidt.

b. *If († and, am) you please*: if it please you, if you like, if it is your will or pleasure: a courteous qualification to a request, the acceptance of an offer, etc.; also (parenthetically), a sarcastic way of emphasizing any surprising statement, as if asking leave to endure it. (So F. *s'il vous plaît*. Cf. *by your leave*: see LEAVE *sb.* 1.)

How you may have been originally *pleased*, as in 3b (1.a. if (it) please you, = I, *si vobis placet*, F. *s'il vous plaît*, Ger. *wenn es Ihnen gefällt*, as in 1306, 1483 in 21 but it is now taken as conditional (i.e. If you are pleased, if you like, if it is your will or pleasure): cf. *If he please*; *If that please*, above (in 1); and "*If so please*" here in 1510. Shakspere has both *if you be pleased* (5), and *if you please*.

c. *Please!* (imperative or optative) was app. originally short for *please you* (3 c) = 'may it (or let it) please you'; but it is now usually taken as = 'Be pleased' (imperative of 6), or as short for 'if you please' (5 b).

This use of *please* appears to have been unknown to Shakspere, whose normal form is *please you* (3 c).

When parenthetical, or without construction, *please* is or may be *please you*, *if it please you*, *if you please*; e.g. Please, may I go out? May I come in, please? Come here, please. Give me my hat, please. Please, sir, did you call? Should I ring the bell? Yes, please. Will you, please, take a message for me?

But when followed by an infinitive, it is = Be pleased: e.g. Please to excuse my keeping you waiting: Please to return the book soon: Please not to bow it.

Pleat (plēt), *sb.* Also 5 plete, 6–7 pleate. [A collateral form of Plait *sb.* (appr. akin to the *fl* forms there); cf. OF. *plet* a fold (in Godef.).

This form of the *sb.* appears to have become obsolete in the 17th c.; it is absent from the 17th, 18th, and early 19th c. dictionaries, and conspicuous only in those of the late 19th c. (e. g. Alexander's Ogilvie, Cassell) with a cross-reference to *Plait*. But as a spoken word it was in use in the 18th c., for Walker 1791 s.v. *Plait* says 'There is a vulgar pronunciation of this word, as if written *plete*, which must be carefully avoided'. This pronunciation has not only persisted itself, but in the latter part of the 19th c. has caused the reinvention of the spelling *pleat* in sense 1.]

Like the *sb.* Pleat, the *vb.* appears to have become practically obs. by 1700, after which the only examples are dialectal in sense 2, till late in the 19th c., by which the *vb.*, like the *sb.*, has been restored to use: 1. Like the *sb.*, it was certainly much earlier in spoken use in this sense, and although ignored in the dictionaries may have been current from the 17th c. onward.]

Astron. In *pl.*, A close group or cluster of small stars in the constellation Taurus, commonly spoken of as seven, though only six are visible to the average naked eye. (Good eyes on a clear night can make out about nine, while the telescope shows a great number.)

According to Greek Mythology, the Pleiads were the seven daughters of Atlas and Pleione, the eldest of whom, Electra, was 'the lost Pleiad', and not represented by a star. The seven stars, with those of the parents, have since Ptolemy (150) been individually applied to the nine brightest stars : of these Alcyone is of the third magnitude, Electra and Atlas of the fourth, Merope, Maia, and Taygete of the fifth, Pleione, Celæno, and Asterope, between the sixth and the seventh. Some think that the name was actually derived from *πλεῖν* to sail, because the season of navigation began with their heliacal rising.

‡ **Pleroma** (*plĭrōːmă*). [a. Gr. πλήρωμα that which fills, a complement, f. πληροῦν to make full, f. πλήρης full.]

1. Fullness, plenitude; **a.** in Gnostic theology, The spiritual universe as the abode of God and of the totality of the Divine powers and emanations.

1569 Mascall tr. *Bonhome's Eccl. Hist.* v. 71 b, v. 1163/2 God's Sea placed in the *pleroma* (as the Gnostikes called the habitation of the Deity) thirty aeons. 1832–3 E. Everett *Rem. Hist.* III. 1845/2 If One of these great emanations passed the boundaries of the Pleroma, which was the abode of the Deity, and there coming in contact with matter created the world. 1874 Lightfoot *Colossians, Col.* i. 19 For this reality [of the Divine powers] Gnostic teachers had a technical term, the *pleroma* or *plenitude*.

b. Used in reference to Colossians ii. 9, where the Eng. versions from 1388 have "fullenes":

"Yee in him ouercomen, who is κεφαλὴ πάσης ἀρχῆς καὶ ἐξουσίας: Wyclif 1388, "For in him dwellith fodlich al the fulnesse [1611 al pleroma, Vulg. plenitudo] of the Godhed".

Ch.* II. 272 note, 272 The *pleroma* of the Godhead resides in Christ personally: in the *pleroma* of Christ, the plenitude of his graces and energies, resides in the church as his body.

2. *Bot.* = Perigone. *rare*[—1].

Hence **Pleromatic** (*plĭrōmæ·tĭk*) *a.*, pertaining to the pleroma.

1858 Morus *Expos. Lex.* 90/2 The *pleromatic kingdom* was the name given to Swedenborg to the whole powers which animate the world and the stars which fill the celestial space. 1879 Dorner *Person of Christ* 26 The completeness or pleromatic fulness of the moral and religious character of Christ.

Plerome (*plĭrōːm*). *Bot.* [adj. Gr. *pleroma* (Hanstein 1868), ad. Gr. πλήρωμα a filling: see prec.] The innermost layer of the primary tissue or meristem at a growing-point, which develops into the fibrovascular tissue, or into this and the pith. (Cf. Dermatogen, Periblem.)

1879 Dumortier & Duby *Jacobs' Bot.* 129 If one pith is formed, as in many roots and some shoots,...the whole of the plerome is developed into procambium. 1884 Bower & Scott *De Bary's Phaner.* 7 As Hanstein has shown, the young embryo of the Angiospermous Phanerogams separates, while still consisting of few cells, into three layers, or groups of cells, which differ in their arrangement and direction of division: these were named by their discoverer, Dermatogen, Periblem, and Pleroma.

b. *attrib.*, as *plerome body*, *-cylinder*, *-sheath*.

1882 Vines *Jacobs' Bot.* 188 The origin of lateral roots in a monocotyledon is always in the outside of an axial fibrovascular or pleromic cylinder. *Ibid.* 189 Those mother-cells of the lateral roots lie in the plerome-sheath.

Pleromorph (*plĭrōmŏrf*). *Min.* [mod. f. Gr. πλήρης, πλῆρ- full + μορφή form: introduced (in Ger.) by A. Kenngott 1849.] A form produced by the filling of a cavity left by the removal of a crystal with another mineral substance.

1850 in *Cent. Dict.* 1906 H. A. Miers *Lett. to Editor*, A pleromorph is a natural cast of a crystal in some other mineral substance.

Plerophory (*plĭrŏfŏri*). Now *rare*. [ad. Gr. πληροφορία (Heb. vi. 11, x. 22, etc.) fullness of assurance, f. πληροφορεῖν bringing satisfaction, f. πλήρης full, satisfied + -φορία bearing; cf. πληροφορεῖν to bring full measure, satisfy fully.] Full assurance or certainty. Plesiomorphous (*plīːsiŏmɹ̥fəs*), *a. Cryst.* [f. Plesio- + Gr. μορφή form + -ous.] Very near in form; crystallizing in forms closely resembling but not identical with each other. So **Plesiomorphism**, the fact or condition of being plesiomorphous.

1897 Watkins *Hist. Inductive Sc.* III. 122 It has often been proposed to call such groups pleiomorphous. 1913 *N. Brit. Rev.* II. 312 The term *pleiomorphous* (nearly of the same shape) is generally substituted. *Ibid.*, *Plesiomorphism* served to remove the difficulties. 1892 *Dictionary Arran Tha.* vi. 106. 27 It has been proposed to employ the term *plesiomorphism*, where the resemblance between two bodies in mineral form is not regarded as complete. 1890 *Cent. 1829 W. D. Conybeare in *Phil. Mag.* LXV. 427 The name I have originally (in 1821) given to this animal, *Plesiosaurus* (approximate to the Saurians), may appear rather vague in the state of our knowledge. 1835 Sir C. Bell *Nerv.* (1836) 113 The kitchen-maids and pleiosaurus ... inhabited the sea; their remains are found low in the fish deposit. 1854 T. C. Eyton *Rare Brit. Fig. 1878 Lowell *Among my Bks.* Ser. II. 2. 131 Fortunately Southey was not yet answered, or the genus [Polypithecus] would have been even longer, and already it is the plesiosaurus of verse.

Hence **Plesiosaur** (*plīːsiŏsɔ̱ɹ*), a reptile of the extinct genus *Plesiosaurus* or order *Plesiosauria*; **Plesiosaurian** *a.*, belonging to the order *Plesiosauria*; *sb.* a reptile of this order; **Plesiosauroid** *a.*, resembling or allied to the *Plesiosauria* (in quot., characteristic of the *Plesiosaurus*).

Plessigraph (*plĕ·sigrɑf*). *Mod.* [ad. F. *plessigraphe*, f. Gr. πλῆσσειν to strike: see -graph.] (See quot. 1895.)

1. One of the two serous membranes, right and left, which line the thorax and envelop the lungs in mammals; each is reflected on itself so as to form a closed sac, one side or layer of which (*pulmonary pleura*) invests the lung, while the other (*costal or parietal pleura*) is attached to the inner wall of the chest.

Sometimes applied to the upper part of the common membranous lining of the thorax and abdomen in vertebrates below mammals (*peritoneum* or *pleuroperitoneum*).

It includes also the socket of the secondary wings.

b. In molluscs. The region on each side of the rachis of the lingual ribbon of the odontophore.

Mollusca* 30 The lateral areas are called the pleuræ. 1870 Rolleston *Forbes*, etc. The pleuræ are in one piece with the rest, and are separated from it by a more or less pronounced groove, the 'zonal furrow'.

Plough, plow (plau), *sb.*[1] Forms: see below. [Late OE. *plōh* (*plōg*), = ON. *plógr* (in Eigsmál 19–1118 c.); so Sw. *plog*, Da. *plovg*, *plov*; in OFris. *plōch* (EFris. *plog*, NFris. *plooger*), MLG. *plōch*, *plōg*, MDu. *ploech* (Du. *ploeg*), OHG. *pfluog* (MHG. *pfluc*, Ger. *pflug*).—Teut. type **plōgo-* or **plōko-*, whence also Lombard Lat. *plo'mum*, -*us* (Du Cange), Lomb. *pō*, Tirol. *plof* plough. The regular OE. inflexion of *plōh* would have dat. *plōge*, gen. *plōges*, nom. pl. *plōgas*, giving in early ME. *plōh*, *plōge*, *plōges*, later *plouh*, *plowh*, *plowgh*, pl. *plowes*; whence, by form-levelling, *plough*, *plaughe*, or *plowe*, *plowes*; the former the accepted spelling in England since 1700, the latter usual in U.S. In pronunciation, the final guttural was lost in some districts in 14th c., and has quite disappeared not only in the standard language, but in all dialects south of the Peak of Derbyshire; it remains in Scotland as *x*, *χ* (*plouch*, *plouch* = *plūχ*, *plūχ*), and in the north of England is represented by *f* (*plouf*, *plowf*, *plauf*, *plauf*, *plauf*, *plūf*, etc.: see *Eng. Dial. Dict.* s.v.). In PLOUGH *n.* (q. v.) neither *gh* nor *f* is pronounced.

As with path, power, and other early *p*-words in Teutonic, the origin of *plōh*, *plōg*, is involved in obscurity. Apparently the word was of late appearance. It is not found in Gothic, which used *ahtis*, not in Old Norse, which used *plógr*, still retained colloquially, esp. in s. w., where *plough* is not used in the sense: see ROLL, and cf. *Eng. Dial. Dict.* In Norse, also, the earlier name appears to have been *arðr*, cognate with OE. *ærdle*, L. *ōrā*, Gr. ἄρο-ω, to till, plough (see EARTH *v.*); in Norwegian as *ar* a small plough, *pach*, as earlier and simpler implement than the *plógr*. The name is also found in Lith. *plúgas*, and in the Slavonic tongs. *pruvalŭ*, Obler., Serv., Russ. плугъ *plug*", Pol. *pług*, Boh. *pluh*; but in these admittedly from German.]

It is doubtful however whether the *plough-foot* in Piers Plowman had this meaning: the variant reading *plow-hat* and the context point rather to the plowtry with *plough-staff*.

(The statements of its extent differ widely, and may point to different standards: 1502, 1755 make it 13 acres, 1 r. one eighth of a carucate or plough-land, and so = 1/8 gang: 1508 makes it half a carucate; Jamieson, if his 'one plough' means the original plough and team of eight oxen, identifies it with the carucate; but he may have meant a modern two-horse plough. See next for a fourth value.)

Plough-land, plow-land (plau·lænd). [f. PLOUGH *sb.*[1] + LAND *sb.*[1] cf. OE. *sulhland*, a derivative of *sulh* plough, used in a similar sense in Kent and elsewhere. For the form, cf. ON. *plógs-land* (= plough's land); Sw. *plogland* as acre; and, in sense 2, Da. *ploglænd*, Ger. *pflugland*.]

1. *Hist.* The name used in the northern and eastern counties of England, after the Norman Conquest, for the unit of assessment of land, based upon the area capable of being tilled by one plough-team of eight oxen in the year: corresponding to the Hide of the south and south-east (with which it was often equated), and, like it, embracing originally the meadow and pasture-land, and other necessary appurtenances of the holding.

In Domesday Bk. and other records in Latin, this unit is expressed by *carrucate* (= AF. *carue*, ONF. *carue*, F. *charrue*, *Carucata* a derivative of *carruca* plough, while the *hide* is rendered *hida*. It is not possible to say whether 'plough-land' was a translation of *carrucata* or the converse; but we have no instance of the word before the end of the 13th c., and *plough-land* appears first in the 14th. The fact that the counties in which the *carrucate* was the unit of assessment are precisely those in which Danish influence prevailed, favours the theory that the plough-land was of Norse origin; but there are difficulties. ON. *plógsland* meant an acre, the normal area ploughed in one day. The extent of the normal plough-land, like that of the hide, is usually given as 120 acres; but in numerous instances it fell short of or exceeded this; the variations being probably to attempt to make the small plough-lands correspond with the traditional assessment of the manors, to the inclusion or exclusion of the appurtenances and fallow land, and to local differences in the size of the acre.

The plough-land was divided into 8 oxgangs, as against the 4 yardlands or virgates of the hide.

The connection with rain expressed in the various names has been variously explained. Others, because they arrive in flocks in the rainy season (Aldrov.); according to Prof. Skeat, the Golden and Grey Plovers arrive on the shores of the Mediterranean at the approach of winter. Others, because of the restlessness of the bird when rain is approaching: see R. Lubbock *Fauna of Norfolk* (1840) 60–61. Others have attributed it to the appearance of the upper plumage, as if spotted with rain-drops.]

a WGer. type **plukkôn*. Beside these stands ME. *plokken*, OE. type **plocc(i)an* (PLOCH) = MDu. *plucken*, Du. *plukken*, LG. *plükken*, MHG., Ger. *pflücken* (not in OHG., and still absent from Oberdeutsch dialects), which indicate an unlatined type from **plūkōjan*. These words are thought by some to be derived from a popular L. **pilucāre*, inferred from It. *pilucare* to pluck (hair, feathers, grapes), Pr. *pelucar* to pluck (a fowl). OF. *pelucher* (Mistle-de Prance, *c* 1180), ONF. *peluchier*, *plusquier*, mod.Norm. and Picard *plusquer* to pick, chose, pack, Walloon *plukî* to pick (grain); also with *ex-*, Roumansch *spluccar* to pluck out, *Y. pluccher* to pick, sift; all from a popular L. sb. **pilucus* tuft of hair, downe, of *pilus* hair, widely represented in the Romanic languages: see PILOSE, PERUKE. (See Diez, Körting, s. v. *pilucare*, Klapp s. v. *plücken*.)

It has been suggested that the late L. or Romanic word was taken into Low German in connexion with the trade in down and feathers on the coasts of the North Sea; but, in spite of the close similarity of form and sense, there are chronological, historical, and phonetic difficulties, which are increased by the entire lack of evidence of the occurrence of either the Teutonic or the Romanic word before the 12th c. Cf. French s. v. *plaider*.]

2. *Min.* Black lead or graphite; one of the allotropic forms of carbon: used for pencils, also, mixed with clay, for making crucibles; and for many other purposes.

'Black lead' is the popular, and 'graphite' the strictly scientific name; but the term 'plumbago' is largely used in the arts, esp. as binding.

1784 KIRWAN *Elem. Min.* 158 Plumbago, *Reissblei*...; *Minerals of the Swedes*...It is strongly heat and open fire it is wholly volatile. 1796 in *Schmid's Chem. Ess.* 143 The black lead or plumbago which is generally known to consist...is very different from molybdena. *Phil. Trans.* Hence I am convinced, that plumbago is a kind of mineral sulphur or charcoal; the combustible parts of which are acrid acid and a considerable quantity of phlogiston. 1798 CRAWFORD'S *Min.* (ed. 2) II. 251 Black lead or plumbago is a fossil substance extremely black. 1799 PRIESTLEY in *Phil. Trans.* LXXXIX. 333 The black matter was therefore a compound of iron and carbon, or, as some chemists term it, phlogiston; and which in the new system is denominated a carburet of iron. 1796 KIRWAN *Elem. Min.* (ed. 2) II. 58 Plumbago. Graphites of Werner...carbon combined with other earth or iron, right of its weight of malleable iron. 1799 — *Geol. Ess.* 191 Probably because the iron...had absorbed too great a quantity of carbon, and was thus converted into plumbago. 1808 HENRY *Epit. Chem.* (ed. 3) 243 Another combination of iron and carbon, which is a true carburet of iron, is the substance called plumbago, or black-lead, used in polishing steel, and in covering iron to prevent rust. (In 1815 (ed. 7) II. 120.) 1845 HUMBLE *Dict. Geol.* (ed. 2) 308 Anthracite resembles and appears to pass into graphite. 1846 MCCULLOCH *Acct. Brit. Empire* (1854) I. 609 That very rare mineral called black lead, plumbago, or wad, is found in Borrowdale, in Cumberland. The mines in this place have been wrought since the days of Queen Elizabeth, and furnish the very best material for making pencils and crucible goods. 1869 ROSCOE *Elem. Chem.* (1871) 82 Graphite, or Plumbago, crystallises in six-sided plates.

3. *Bot.* A genus of herbaceous plants, inhabiting Southern Europe, Asia, Africa, and America, having spikes of subsessile flowers, with a tubular five-parted calyx: leadwort: so called from the colour of the flowers. [Pliny's name (rendering Gr. Μολυβδαινα), adopted as generic name by Tournefort, 1700.] Also *attrib.*

1660 HOLLAND *Pliny* II. 356 There groweth commonly or hardly ranged in Greater Molybdæna, that is to say in Latine, *Plumbago*, even upon quarry come land.) 1796 W. MARTYN *Trans. Pliny: Introd. Lectures on Botany* 60 *Plumbago* in Olive Oil. 1796 Lay *Introd. Bot. Appx.* (ed. 2) 527 [Leadwort, *Plumbago*. 1807] A. CHARMAN *Flor. Lewes* 61, 53 He distributed twigs from the plumbago plant to be worn round the neck. 1901 *Cambridge Rev. Mag.* 346 Pale blue plumbagos, yellow coreopsises.

Attrib. in Monographs, *acetabulum*, *I. pistillus* leaf, was applied to a tubular substance in, the root, and a plant. The leaves was yellow yields of lead (Pliny), esp. the foliage produced in the corruption of gold and silver from ores containing lead. By Pliny this is included as molybdena, also ores (under, cf. pd by *plumbago*), which, as well as *galena*, were applied by him to the yellow oxides, but probably confused as an inferior variety the sulphide (PbS), called by Dioscorides *μολύβδινα λόπη*, 'lead-like scores'; the modern GALENA. For the plant Pliny always uses *plumbago*. In the French tract. (1572) of Matthiolus's Commentary on Dioscorides, *prohibitoire* = *plumbago* is rendered *plombagine*; in It. *piombaggine*, and is stated to be identical with *Bluraja*; but other uses may have been included. Hence the explanations of the word by Cotgrave and other English writers down to Bailey: see PLUMBAGINE, and sense 2 above. In Holland's *Pliny*, *plumbago* is rendered *Litharge*. In the 16th c., to Agricola and others in Germany practically interested in mining, *plumbago* mainly meant the sulphide of lead, but also included other substances similar to this in appearance, and to the property of staining the fingers and marking paper, esp. the native sulphides of antimony and molybdenum. STOPES (*Shells*) and MILLINGTON (*Mollia*) call the mineral graphite. In 1565 Orsbeigh, Zobel (Councillor of Saalfeld), while identifying Pliny's *molybdæna*, *galena*, and *plumbago*, distinguished the '*graphites*' species (I. 6, 69) noble and sulphide of lead) from the 'lantes' (*silvestre*), which yielded no lead, and was mainly graphite; the latter was described by Forrester Imperato in 1599 as employed in the *grafio pennibus*, 'leaden pencil'; in 1773 Scheele found that certain samples of the 'lantes' plumbago, on being heated, were dissipated into carbonic acid gas, and that in fact they consisted of carbon: see quot. 1788 in sense 2. In 1789 WERNER and KIRWAN proposed the name GRAPHITE instead of the ambiguous 'plumbago'. But its composition was still disputed. An analysis, made by French chemists in 1788, had given, after volatilization, a residue of iron, and plumbago was pronounced a carburet of iron (see quot. 1796). This view prevailed until KARSTEN in 1808 and SCHEELE in 1804 proved that the iron was only an impurity in the specimens analysed, and that graphite or plumbago was, as SCHEELE had said in 1779, really a mineral form of carbon. (See paper by Dr. John W. Evans, F. G. S., in *Trans. Phil. Soc.* 1907.)]

Plus (plŭs). [a. L. *plūs* more. As in the case of MINUS (q. v.), the quasi-prepositional sense *+* did not exist in Latin, but the words *plus* and *minus* were used by Leonardo of Pisa in 1202 for the excess and deficiency in the results of two approximations in the Rule of Double Position.

The signs + and − are used, app. as well-known signs, in the *Behende und hübsche Rechenung auf allen Kaufmanschafft* of Joh. Widmann (1489 and subsequently, 1518 ed.); but what he refers to the latter as *minus*, the former is said to stand for *mer* (q. *mehr*) 'was *+* bei, das ist mynus, und das *+* ist das mer'. So far as yet collected, English examples of *plus* do not occur so early as those of *minus*.

As to the origin of the symbol *+*, various conjectures have been made; perhaps the most likely is that it originated in the MS. abbreviation of the L. *et* 'and' (which formerly always was in an abbreviated form resembling a *t* crossed: cf. *Geschichte der Mathematik* (1880) II. 250-1, from which these facts are mainly taken), from mathematical MSS. of the beginning of the 15th c., and a non-mathematical MS. of the beginning of the 14th, a form of *& = et* which might easily pass into *+*.]

1. *quasi-prep.* Placed between two expressions of number or quantity to indicate that the second is to be added to the first. In mathematical use only as the oral rendering of the symbol *+*. Hence, in non-technical use: With the addition of; with... besides. (Opp. to MINUS 1.)

Characters*, &c.] +] is also the sign of addition, and is read *plus* or more; thus 5+3 is read 5 *plus* 3, or 5 more 3: that is, 5 added to 3, or the sum of 5 and 3, equal to 11. 1848 *Mills Pol. Forces* 126 (1) It is composed of one atom-volume of hydrogen plus two of oxygen. 1851 *Laws Exp., Weights Water* 38/2 The same rate as that stated in the balance order, *plus* duties thereon.

b. *predicatively.* † (*a*) Absolutely supplied with, containing as excess of something (*obs. rare*—°). (*b*) *colloq.* Having (something) in addition, having gained (opp. to MINUS 2 b).

2. As the oral rendering of the sign + in its algebraical use to denote a positive quantity, as *+x*, read *plus x*. Hence *attrib.* or *adj.* in *plus quantity*, a quantity having the sign + prefixed (or not having the sign −), a positive quantity. (Only as opp. to MINUS 2, 2 b.)

P.M., abbrev. of POST MERIDIEM, afternoon, q. v.

Pn-, an initial combination occurring only in words from Greek; the *p* is usually mute in English.

(The *p* is pronounced in French, Spanish, Italian, German, Dutch, and other European langs.; also by Englishmen in reading Greek. It is to be desired that it were sounded in English also, at least in scientific and learned words: since the retention of *pneu-* in *neu-, pseu-* in *seu-*, and *pneo-* in *neo-*, is a loss to etymology and intelligibility, and a weakening of the resources of the language.)

Pneo- (pnēo, nēo), combining element from Gr. πνέ-ειν, πνεῦ- to blow, breathe, used in a few rare scientific terms.

† **Pneobiognosis** (nēobaiŏgnōu·sĭs) [mod. L., f. Poetry (pōe'tri). Forms: 4–7 **poetrie**, 5 **-trye**, **-treye**, 6 *Sc.* **poyetrie**, 5– **poetry**. [ME. – OF. *poetrie, poëterie* (13–14th c.), edd Et. *poëtrie* (Florio); ad. late and med.L. *poëtria*, f. *poëta* poet.

Poëtria seems to a reduction on Horace's *Epist.* ii. 1. 117, written according to O. Keller, *Prosodie* (1870, 20th. II. North Italy, and preserved in MSS. of 10th c., also in 9th or 10th c. MSS. of Martianus Capella. It is used as the title of treatises on the art of poetry, viz. the *Nova Poëtria* of Gaufredo de Vinosalvo (Godfrey de Vino Salvo, also called Galfridus Anglicus) about or soon after 1200; and in various works of the 13th c., as the Grecismus of Eberhardus Bethuniensis c 1210 (*Ars* poetrie begyn dum fingo poema), the translation of Aristotle's paraphrase of Aristotle's Poetics by Hermannus Alemannus (1256), and the *Catholicon of Joannes de Janua*, 1286 (*a poeta, poetrius*, et hinc *poetria* ars poetica). (J. Bywater.) The relation of the word to L. *poëtria*, Gr. ποιητική, poetica, is not clear; but, from its antiquity, to translate *poëtria* cannot be identified with *F. poësie*, Eng. *-ery*, -*ry*, in such words as *chivalry, drollery, foppery, mimicry*. The earliest English examples are from Chaucer, to whom the *Nova Poëtria* of Galfridus was well known, as he makes the Nun's Priest refer to it in his Tale (l. 3351 and apostrophize the author as 'O Gaufred deere Maister soverayn'.]

W. MACKAIL *Lectures on Poetry* In general, the essence of poetry as an art is not so much that it is rhythmical (which all elevated language is), or that it is metrical (which not all poetry is), except by a considerable extension of the meaning of the words, to that it is *patterned* language. This is its specific quality as a "fine art". The essence of 'pattern,' (in its technical use, as applied to the arts) as distinct from 'composition' generally, is that it is composition which has what is technically called a 'repeat'; and it is the 'repeat' which mechanically differentiates poetry from non-poetry, both being (in one) 'composition'. The 'repeat' may be obvious, as in the case of rhymed lines of equal length, or it may be more implicit, to any degree of subtlety; but if it does not exist, there is technically no poetry. The artistic power of the pattern-designer is shown in the way he deals with the problem of 'repeat'; and this is true of poetry likewise. And it probably the key (so far as one exists) to any technical definition or discussion of the art.

b. The product of this art as a form of literature; the writings of a poet or poets; poems collectively or generally; metrical work or composition; verse. (Opp. to *prose*.)

Point-blank (poi·nt blæ·ŋk), *a., sb.,* and *adv.* Also 8–9 -blanc. [1591. f. POINT *n.*1 + BLANK, the white spot in the centre of a target, = F. *blanc,* Sp. *blanco* (in Eng. also called 'the WHITE').

It has been conjectured that *point-blank* represents a F. **point blanc* meaning *the whitish point or white spot on the target*, but no such use is found in Fr., or in any Romanic lang. The phrase appears exclusively of English origin and early and there is no evidence that in Eng. the 'blank' or 'white' was ever called the *point blank*. The probability therefore is that *blank* is here the ch. BLANK *sb.* 2, and *point* the vb. (POINT *v.*1 12), referring to the pointing of the arrow or gun at the 'blank' or 'white'; *point-blank* being a combination of the same class as *broad-neck, cat-throat, cross-all, staghead*, etc. It may have started in an adj., in *point-blank shot, distance, reach*, or *range*, i.e. that in which one *points* or aims at the *blank* or white spot.)

A. *adj.*

1. That points or aims straight at the mark, esp. in shooting horizontally; hence, aimed or fired horizontally; level, direct, straight; as in *point-blank shot, fire, firing, trajectory. Point-blank distance, range, reach*: the distance within which a gun may be fired horizontally at a mark; the distance the shot is carried before it drops appreciably below the horizontal plane of the bore.

(As to the inaccuracy of the notion that the curve of the projectile is level within this distance, see quot. 1804.)

This is a mistake; for the ball immediately falls from the axis of the gun, the tangent of the curve described, though but insensibly for a short time; but the line in which gunners take sight is usually continued to make a small angle with the axis, so that ... the ball will rise above the line of sight, and then, by the force of gravity, be made to fall again into it, at the place called the point-blank shot. 1818 HAMILTON *Reg. 'devised, arranged', and as ch. 'a device, arrangement, will, wish, desire'. The construction in *à point devis* requires the adj. sense, so that the phrase may be construed either 'to (the) point arranged', or, as *devis* is *point*, 'arranged to a proper point or degree, arranged properly or to perfection'. The latter appears to M. Paul Meyer the better construction of the words.

1. A modification of the condition of light or radiant heat, whereby the ray exhibits different properties in different sides, so that opposite sides are alike, while the maximum difference is between

Polarize (pō·lărəiz), v. [In sense 1, a. F. *polariser* (Malus, 11 March 1811), in form f. mod.L. *polāris* POLAR a *-iser*, -IZE, but referred by its author directly to F. *pôle* POLE n.[2] In other senses, f. POLAR + -IZE.]

See Malus in *Mémoires Institute des Sciences*, No. 4th March 1811, p. 232 (*Annales polarisés*. *Ibid.* No. 25, June 1811, p. 292 (*round*.) 'En giving to these sides [of the vertical ray] the name of *poles*, to only the modification which imparts to light properties relative to these poles, *polarization*. The new expression ...signifies simply the modification that light has undergone in acquiring new properties, relative not to the direction of the ray, but solely to its sides, considered at a right angle, and in a plane perpendicular to its direction.' But this unfortunately assumed a sense of *pole* quite different from its use in astronomy, geography, and magnetism, with the consequence that *polarization* as applied to light and radiant heat has nothing in common with magnetic or electric polarization.

I. 1. *Optics.* (*transf.*) To cause the vibrations of light (radiant heat, etc.) to be modified in a particular way, so that the ray exhibits different properties on different sides, opposite sides being alike, and those at right angles to each other showing the maximum of difference.

A ray of polarized light is reflected in different degrees in different positions of the reflecting body, and transmitted by certain crystals in different degrees in different positions of the crystal, and in each case completely quenched in two particular positions. This is accounted for by supposing the ethereal vibrations to be restricted to one plane (*plane polarization*, instead of being, as in ordinary light, performed in all directions perpendicular to that of the ray. Light is also said to be *circularly* or *elliptically polarized*, or to undergo *circular* or *elliptic polarization*, when it exhibits the 2 polarization certain colour phenomena, or modifications of the phenomena of plane polarization, which are accounted for by supposing the ethereal particles to move in circles or ellipses. Polarization is produced (variously in the case of different media) by reflection, or by ordinary or double refraction.

Pole, obs. form of Fadl, Poll, Pool, Pulley.

-pole, combining element from Gr. -πώλης a seller, dealer (as in αἰγοπώλης wine-seller), f. πωλεῖν to sell, used merely to designate a merchant, as in Monopolist, Freemonopole.

In the 16th c. the word began to be written by some *pole-ax* (which after 1640 became the usual spelling), as if an ax upon a *pole* or long handle. This may have been connected with the use of sense 2. Similarly, mod.Sw. *pålyxa* and Westphalian dial. *pål-axe* have their first element = pole. Sense 3 may be a substitute for the earlier *hole-ax*, which was applied to a butcher's ax.]

1. A kind of ax formerly used as a weapon of war, a battle-ax; also, a form of this retained till the end of the eighteenth century in naval warfare for boarding, rending boarders, cutting ropes, etc.

It probably varied in form at different times, but originally (and in naval use to the end) it was a short-handled weapon, which could be hung at the saddle-bow or held under the shield, and used in close fighting: in the west. Even Chaucer's is one of the short weapons specially forbidden at the combat. It can be render by *Halbarde* (with edged ax, as the Pourpoynton and Catholicon, and by Sandys, suggests that it had usually a cutting edge or point also on the side opposite the broad face.

3. The regulation, discipline, and control of a community; civil administration; enforcement of law; public order.

The early quotations refer to France, and other foreign countries, and to Scotland, where Commissioners of Police, for the general internal administration of the country, consisting of six noblemen and four gentlemen, were appointed by Queen Anne, 15 Dec. 1714. This was 1707, the first official use of the word in Great Britain. In England, it was still viewed with disfavour after 1780. A writer in the *British Magazine*, April 1783, p. 241, opines that 'from an aversion to the French...and submitting under the name of *police* being already established in Scotland, English gentlemen will not easily be reconciled to it'. (The name *Commissioners of Police*, as *Police Commission*, was in the 19th c. given to the local bodies having control of the Police force in Burghs and Police Burghs in Scotland.)

Gr. *ἀπόδειξις* a making known, demonstration, evidence, proof. The word appears to have had in Italian a very general sense, being applicable to a writing setting forth or serving as evidence of any kind of transaction.

The fore-development *apódixa*, *polissa*, *polissa*, is supposed by Pg. *apólice*—L. *apódixa*, and the Prov. form *polissa*. The Eng. final *-ie*, *-ey* either represents the variants *apodixa*, *polissie*, or perhaps merely followed Policy *sb.*[1] as a representation of F. *police*. Earlier suggestions of a derivation from L. *pulicipédium* contract, engineer, schedule, pl. *pulicipédia* (gth c. Vegetius), engineers, account-books, is from *pollex* thumb (in the supposed manner of sealing a document), or from *pollicitor* to promise, are all untenable.]

Polk, -*e*, obs. and dial. var. PELK, pool.

Polka (*pōlkă*), *sb.*¹ [= Fr. and Ger. *polka*: of uncertain origin. The usual being of Bohemian origin (orig. called *Hirsova*), it has been suggested that *polka* was a corruption of Czech *pulka* half, 'a characteristic feature being its short half steps'. Another suggestion is that the actual form, whether or not altered from *pulka*, is due to the Polish *Polka*, fem. of *Polak* a Pole: cf. *polonaise* (also a dance), and *mazurka*.]

1. A lively dance of Bohemian origin, the music for which is in duple time.

Danced at Prague in 1835, at Vienna 1839, Paris 1840, London in the spring of 1844: see *Memoirs of Baron Bl.* I. 76 (Sterling (1902) 106). *Polka-mazurka*, a modification of the mazurka danced to the movements of a polka.

1844 (Heap) *Lond. News* 25 Mar. 184 The Polka is an original Bohemian Peasant Dance, and was first introduced into the fashionable salons of Berlin and St. Petersburg, about eight years since. 1844 Lady Eastlake *Trans.* I. *Cons.* I. 233 A polka danced, only to her children, because so evidently taught by a dancing master. 1846 Thomas *Supple., Polka*, or Hungarian dance lately fashionable in France and England. 1847 Miss Yonge *Two Guardi.* xiii. Mus. Terms* 300/1 The polka was so popular that it absorbed every other dance for a time. ...Articles of food, of clothing and of ornament, were named after it. 1900 *Illustr. Lond. News* 21 May 707/1 You perform the galop waltz, substituting the Polka step just described.

2. A piece of music for such a dance, or in its time or rhythm.

1844 *Illustr. Lond. News* 27 Apr. 260 The fourth polka by Julien. Composed on National Bohemian and Hungarian Melodies. 1848 Thackeray *Bk. Snobs* xxv, You recognise those polkas? They were played at Devonshire House ...the day of the grand fête. 1867 Miss Braddon *R. Godwin* I. i. 16 The guests were playing a joyous polka much itself heard among the tunes.

3. On account of the popularity of the dance, *polka* was prefixed as a trade name to articles of all kinds (cf. quot. 1898 in 1); e.g. the *polka curtain-band* (for looping up curtains), *polka-grease*, *polka hat*; **polka-dot,** a pattern consisting of dots of uniform size and arrangement.

1898 W. S. Caine *1,001 Odds!* Polka Song Book and Old Friends Offo, containing Comic and Sentimental Songs, Duets, Glees, etc. 1852 *Mechanic Lond. Labour* I. 383/1 We won't give a farden for the polka hats with the low crowns. 1883 *Century Mag.* July 396/1 To the end of which [bar] is hinged, what is known, technically, as the 'polka', with scarlet body, red buckle, brown and white tail, and wings of the spotted feathers of the guinea-fowl. 1884 J. Hence (nonce-wds.) **Polka** *v. intr.*, to dance the polka; **Polka'ist** *sb.*, of the character of a polka; **Polkamu'nia,** a mania for dancing the polka; **Polkery,** an assembly for polka dancing; **Polkist, -iste,** one who dances the polka.
